

Environmental, Health & Safety Evaluation

Conversion Technology Inc. has assisted hundreds of companies with achieving compliance by conducting Environmental, Health, and Safety (EHS) evaluations. CTI has the reputation of reducing liabilities and bringing and maintaining facilities in compliance at a minimum cost.

The facility's EHS compliance status is assessed in the following areas:

- Air Quality
- Occupational Health & Safety
- Water Quality
- MSDS Management
- Spill Prevention
- Hazardous Materials & Waste Management (SARA, Asbestos, Hazardous Waste, etc.)
- Land Protection
- Employee Right-To-Know
- EHS Management

The assessment will check compliance with all regulatory agencies, including:

- U.S. Environmental Protection Agency (EPA)
- Occupational Safety and Health Administration (OSHA)
- State Agencies
- City/County Ordinances

The EHS evaluation report will provide the facility with specific information on the applicable permits and plans required by EHS regulatory agencies. It will also prioritize those items that are needed to bring the facility into full compliance.

Additional EHS Evaluation benefits:

- You can reduce environmental liability
- Customers will recognize your company as an environmental responsible organization
- You can also improve your corporate image and investor relations
