

# Safety & Health Training and Inspection

## Does your company need safety training that is Effective, Flexible AND Affordable?

In the past, companies have had to choose between a training program that was effective, a program that adjusted to the needs and schedule of their company, or a training program that was affordable. Fortunately, you no longer have to make that choice. Conversion Technology Inc. (CTI) provides high quality, customized on-site training that will help you to achieve cost effective compliance with OSHA regulations.

### The following is the list of training courses we provide:

- |   |  |  |
|---|--|--|
| <input type="checkbox"/> Back Care Safety/ Ergonomics | <input type="checkbox"/> Hazard Communication                  | <input type="checkbox"/> Personal Protective Equipment                               |
| <input type="checkbox"/> Bloodborne Pathogen          | <input type="checkbox"/> Hearing Conservation                  | <input type="checkbox"/> Respiratory Protection                                      |
| <input type="checkbox"/> Confined Space Entry         | <input type="checkbox"/> Heat Stress                           | <input type="checkbox"/> Slip and Fall Prevention                                    |
| <input type="checkbox"/> Crane Safety                 | <input type="checkbox"/> Hot Work/Welding                      | <input type="checkbox"/> Warehouse, Storage & Safety                                 |
| <input type="checkbox"/> Fire Response                | <input type="checkbox"/> Lockout/Tagout &<br>Electrical Safety | <input type="checkbox"/> Additional Training Sessions<br>as Required at the Facility |
| <input type="checkbox"/> Forklift Safety              | <input type="checkbox"/> Machine Guarding                      |  |
| <input type="checkbox"/> Handling of Flammables       |  |  |

Clients can select from over seventeen safety topics from the above list to customize a training program that is specific to the needs of the facility. We can provide a full range of topics in a single day, or we can provide multiple sessions of a few topics – allowing employees to work through the day. The number of topics and how often they are presented is completely up to you.

We understand the cost of halting production to conduct training, so the scheduling of the training can also be customized. Our trainers can spend a day or more on site at one time, or we can set up quarterly sessions to spread the training throughout the year. We can provide tool-box training sessions in the morning, extended-lunch sessions, and even weekend sessions. No matter how hectic your schedule, we can always fit you into ours.

### Do you want to eliminate hazards before they cause harm?

As an added service for clients selecting the quarterly training sessions, one of CTI's knowledgeable safety engineers will conduct a full safety inspection of the facility during each visit. The inspection reports will provide cost-effective recommendations and will document the corrective actions taken. This allows the facility to identify and eliminate workplace hazards before they result in an injury or OSHA citation.

To avoid violations, reduce insurance costs, and most importantly, ensure the safety of your employees, proper safety and health training needs to be provided at your facility (simply showing a film is not enough). CTI's high-quality and flexible training will enable your facility to meet its safety goals, and it is provided at a price that is affordable, even in these economic times.

If you are interested in receiving a quote for EHS training or other consulting services, please fill out the reverse side of this page and fax it to 770.263.8348, mail it, or feel free to contact CTI at 770.263.6330, or by e-mail. We welcome every opportunity to work with you.
