The SingleClick™ Environmental, Health, & Safety Management System

The SingleClick™ Management System makes it easy to organize, monitor, and manage the environmental, health, and safety (EHS) compliance of all of your facilities. The SingleClick™ System is a password-protected system. The EHS main screen is tailored for each individual facility's needs and specifications.

INFORMATION IS AUTOMATICALLY UPDATED THROUGH THE INTERNET

WHAT WILL THE SINGLECLICK™ SYSTEM DO FOR YOU?

Feature	Your Benefit
Total Global Management	<ul style="list-style-type: none"> Links each facility's EHS Program To the Corporate EHS System. Allows BOTH SIDES to monitor compliance deadlines. ENABLES you to access and manage each individual facility from your headquarters across. Provides a "Global" overview of your entire company's EHS
Time Saving Capability	<ul style="list-style-type: none"> INTEGRATES all new EHS data into the system. Provides SIMPLE, organized desktop-access to all your data. PROVIDES each user with updated information. ELIMINATES the tedious learning-process involved with most software (it uses the Microsoft®, Lotus®, and/or Corel® applications that you already know how to use). Allows for easy SELF-MAINTENANCE. Omits memorization of long, complex file names.
Complete EHS Coverage	<ul style="list-style-type: none"> The SingleClick™ Management System covers your entire company's EHS permits and reporting requirements, training status, and compliance status. It also creates a comprehensive EHS Project Calendar, alerting you to the status of each of your facilities' compliance deadlines.
Customized Features	<ul style="list-style-type: none"> SARA calculation and reporting. Recordkeeping required by the air quality permit and OSHA. Compliance evaluations and auditing reports. Daily, weekly, monthly, and annual inspection reports required by OSHA, the EPA, state agencies, etc. Any other required reporting and recordkeeping.

The system is tailored to suit your facility's exact needs and specifications.

WHAT HAPPENS WHEN YOU CLICK ON EACH BUTTON?

Button	Gives you Access to
Air Quality	An electronic version of the required recordkeeping as specified in your facility's air permit conditions. You will be able to print the reports required in the permit conditions in a version preferred by the state.
Compliance Calendar	<ul style="list-style-type: none"> An EHS Compliance Calendar - a monthly calendar that shows reporting and update deadlines as well as the EHS tasks for each day of that month. A monthly program/permit maintenance checklist divided into weekly and daily maintenance requirements.
EHS Inspections	Completed periodic inspection checklists, inspection forms, and a self-evaluation audit checklist.
EHS Tasks	A listing of the daily, weekly, monthly and other periodic maintenance required for each of your facility's EHS programs and permits.
ISO	Provide electronic recordkeeping and reporting as required by the facility's ISO 14001 guidelines.
MSDS	A user-friendly management database for your MSDSs (Material Safety Data Sheets).
OSHA	A system for managing the health and safety programs at your facility, allowing you to maintain records for each program and create easy-to-follow implementation reports.
SARA	A system used to determine your facility's SARA Title III Section 312 (Tier II) and Section 313 (Form R) reporting requirements.
Stormwater	A system for managing your facility's Stormwater Pollution Prevention (SWP) Plan, including: <ul style="list-style-type: none"> Quarterly inspection reports, annual reports, test results, SWP up-date schedules, & a copy of the Stormwater Permit & its conditions.
Training	A system used for tracking training requirements for all job functions, maintaining training records, dates of completed training, and dates for future training.
Waste	A system for managing the waste generation at your facility: <ul style="list-style-type: none"> Calculate monthly hazardous waste generation rates, manage the waste manifests, access information related to waste transporters and disposal facilities, maintain test results of the waste streams, view disposal guidelines for each waste stream, etc.
Wastewater	A system to manage your facility's wastewater discharges, including: <ul style="list-style-type: none"> Permit conditions and test results. Easy preparation of reports required by regulatory agencies.
